

Welcome

Welcome, Minecraft builders of any skill level and build style!

We're a non-competitive online group.

Every meetup, we have a theme and 1h30 to build in creative mode on a shared server.

Let's grow our skills together and admire the variety of builds others come up with in the same timeframe.

Getting Started

Pre-Requisites

To participate, you'll need Discord and a java Minecraft client:

- Download Discord here: <https://discordapp.co...>
- Download the Minecraft client here: <https://www.minecraft...>

Discord is to talk during the event, and the Minecraft client is so you can join the Minehut server where we'll build.

Create an account on both platforms (if needed), and note your username(s).

Before you play for the first time

1. Send your Discord and Minecraft usernames to the organizer to ensure you can join.
2. Add bbbmeetup.minehut.gg to your list of servers in Minecraft:
 - From the home screen, select "Multiplayer".
 - Click "Add Server".
 - Enter bbbmeetup.minehut.gg in the Server Address.

When the event starts

1. Join the Discord server (the online event link in Meetup is your invitation link) and head to the Voice Channel "Gaming" to hear us.
2. Join the BBB Meetup Minecraft server from Minecraft.
3. Head to the welcome booth next to the spawn point.

How to Play

1. When you spawn, head to the welcome booth.
2. Wait until everyone is ready to start.
3. When we're all ready, look for a place to build.
4. Don't build too close to other builders; give them ample space for their builds. The first builder who places a block gets the spot.
5. Build until the time is up.
6. If you wander far from the spawn point, remember to note your coordinates!
7. Regroup to the welcome booth, and we'll visit each other's builds.

Rules

1. Be courteous and encouraging.
2. When choosing your build location, keep far away from others. First arrived, first served.
3. Don't destroy or interfere with other builders' work.
4. You are allowed to prepare in advance and look at tutorials or references.
5. Be mindful that, for technical reasons, your content may be deleted at any time.
